New from LAUFFER

The new generation of twin-stack CLC Compact Lamination Systems offers proven LAUFFER quality for your card production and all cards with an all new design:

Minimal footprint

Integrated thermoil heating and electronics, integrated hydraulics and PC control allow for minimal floor space.

Plug and Play

Standardized hard- and software minimize logistics, installation- and training requirements.

Optimized heating technology

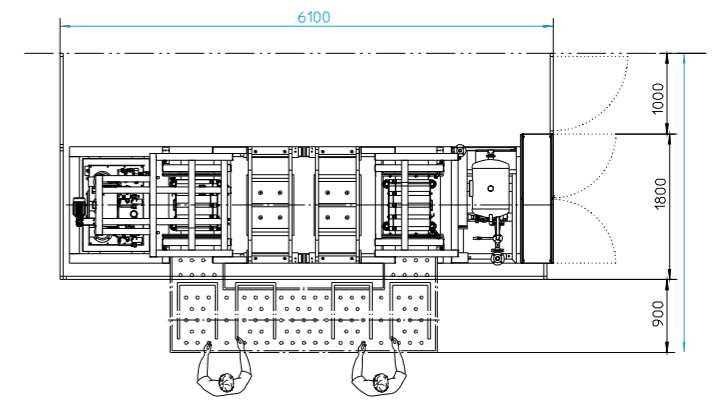

The newly developed thermoil heating unit allows for more energy efficient production cycles.

Standardized Options

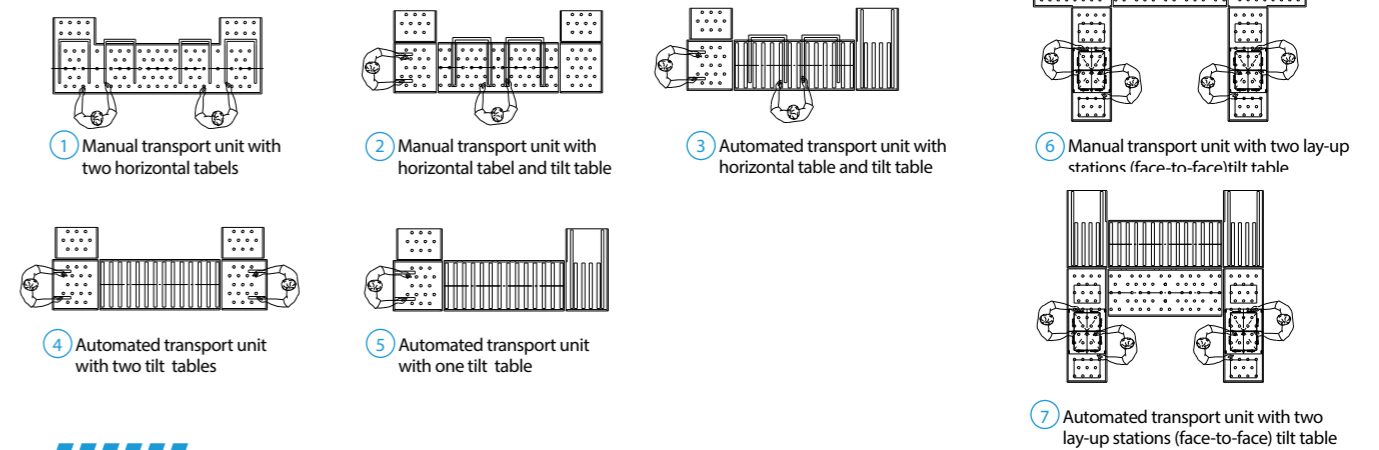

Lauffer's modular CLC design allows for predefined system options to suit your production needs at a high cost effectiveness.

Lauffer's New CLC Design

CLC Handling Options

CLC System Options *

- » Vacuum System (heating press)
- » Weight compensation
- » Advanced heating system
